Certified instructors, including PhD and DSc level
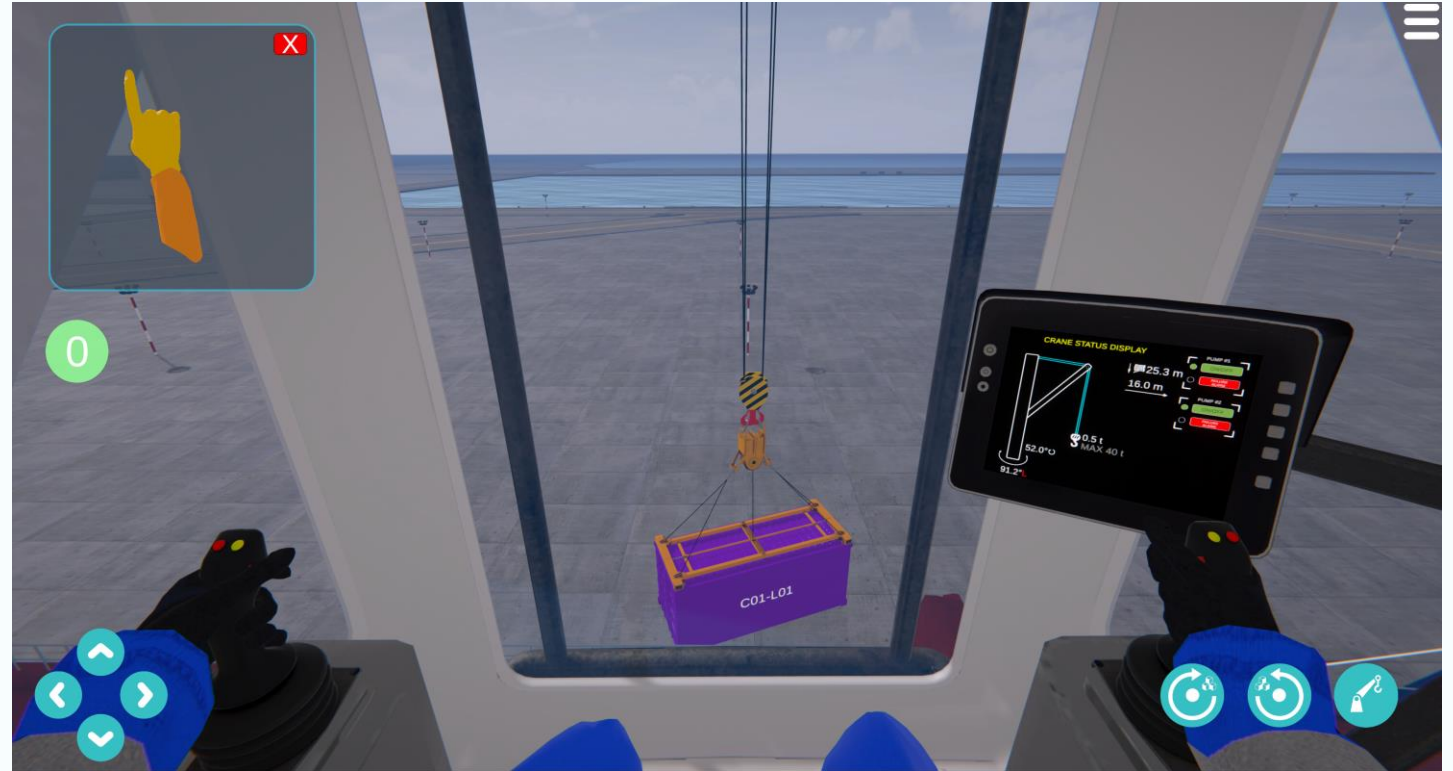

Blended learning model

Blended learning: skills training

**Simulators for research
and training**

Virtual reality visualization

**VR Crane Simulator**

Crane operators' skills training

VR Crane Simulator

Multi-student network solution

**VR Crane Simulator**
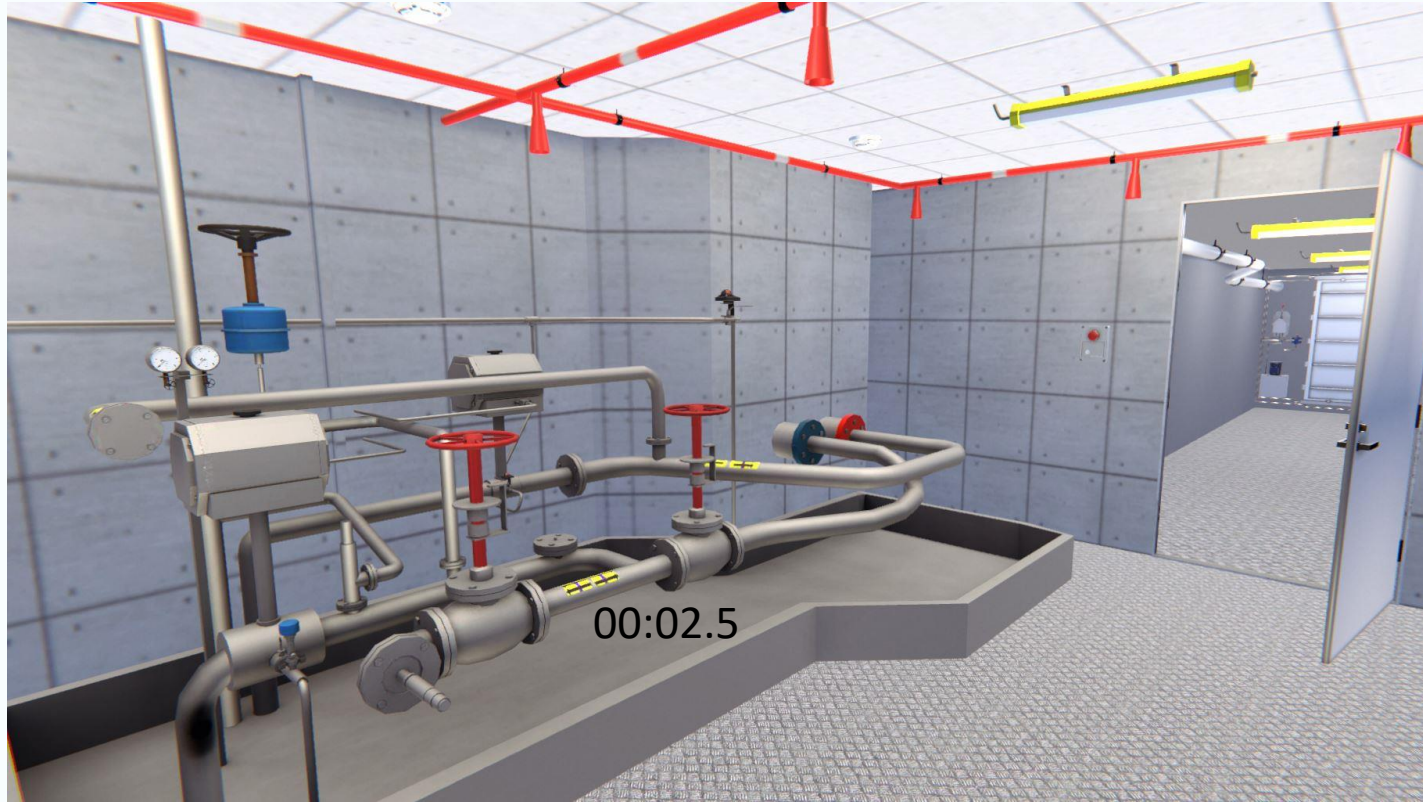

Built-in examination routines

VR Crane Simulator

Familiarization with LNG bunkering and fuel gas supply system

Gas Fuel Bunkering Simulator

System layout and flow diagrams

Gas Fuel Bunkering Simulator

00:02.5

Watchkeeping and Troubleshooting

Gas Fuel Bunkering Simulator

Control System, Automation, Alarm and Safety System (Fire Detection, FFS, ESD)

# Gas Fuel Bunkering Simulator

Other simulators

Ship mooring

ASD tug handling

Real-time stability

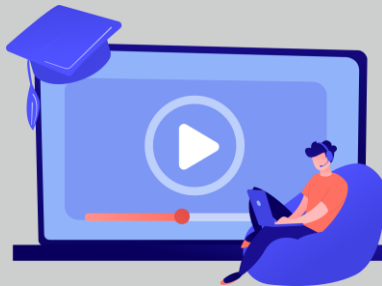

Dangerous goods segregation

Learning management system

Training library customized to the client needs

Interactive online tools

Students learn on their own pace

Learning analytics

Courses for Passenger Ships Personnel
